

Available in Queen,
Full and Loveseat

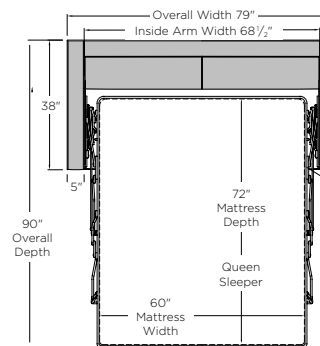

Attached back pillow and/or tight back styles feature a pneumatic and hinged mechanism that lifts the back out of the way when opening the sleeper.

Queen Sleeper

DreamSleep

The sleeper mechanism for this piece requires only 62" inside the arms for mounting purposes. This is due to the unit mounting completely underneath the mattress area. This in return allows us to make the overall width of a queen sleeper 7" smaller than our standard queen sleeper. This unit also provides 8" more depth than our standard unit.

Traditional Sleeper

Our standard queen sleeper has 4 1/4" of exposed unit on each side of the mattress. This causes us to have to make the overall width 7" wider to get a 60" width mattress.

DreamSleep® by SOUTHFIELD

The Industry's
Most Comfortable Sleeper

DreamSleep® by SOUTHFIELD

MANUFACTURED IN THE USA

DreamSleep® by SOUTHFIELD

Southfield, a leading supplier of upholstered seating exclusively for the hospitality industry, introduces **DreamSleep**...

A patented and revolutionary new sleep system that sits and sleeps as good as it looks.

DreamSleep was designed to be the ultimate sleep sofa for properties with guestroom suites that require comfortable and stylish sleepers in a smaller footprint. Each sofa is a full 80" in length, yet still require less floor space than a traditional sleeper. A Queen size sleeper fits in a Full size frame.

The body construction of each **DreamSleep** sofa features an industry tested hardwood frame that is double dowelled, screwed, glued, and corner blocked. The seating area features no-sag springs and is tailored in your COM fabrics.

The sleeping area features a solid sleep platform of hardwood plywood covered with 4" of high density/high resiliency polyurethane foam which eliminates sagging. There are no springs or bars underneath. The sleeper is covered with a luxurious stain-proof ticking for easy care and cleaning.

An optional Gel Memory foam mattress is also available.

KARA

STANDARD FEATURES

- Solid platform sleep surface with 4" HR foam
